Source: 2001, 2003, and 2004 Utah Health Status Surveys, Utah Department of Health.

*** The sample size was insufficient to calculate a population estimate.

Notes: Estimates for the number of uninsured persons have been rounded to the nearest 100.

Data have been weighted to reflect the age, sex, geographic, and Hispanic status of the state of Utah.

Population counts used are those previously published in HSS insurance report documents and may not reflect the most recent estimates currently available for earlier years.

The Utah Health Status Survey was not conducted in 2002.
