1 Population estimates of sex, age groups, and local health district based on 2008 baseline projections, Governor's Office of Planning and Budget, queried February 5, 2009; all others based on the 2008 UHSS and rounded to the nearest 100 persons.

2 Asymmetric confidence bounds were calculated using the logit transformation.

3 Rounded to the nearest 100 persons.

4 Figures in these columns may not sum to the total because of data weighting and missing values on the grouping variables.

5 These rates have not been age-adjusted. Age-adjusted rates are available upon request.

1 Population estimates of sex, age groups, and local health district based on 2008 baseline projections, Governor's Office of Planning and Budget, queried February 5, 2009; all others based on the 2008 UHSS and rounded to the nearest 100 persons.

2 Asymmetric confidence bounds were calculated using the logit transformation.

3 Rounded to the nearest 100 persons.

4 Figures in these columns may not sum to the total because of data weighting and missing values on the grouping variables.

5 These rates have not been age-adjusted. Age-adjusted rates are available upon request.

1 Asymmetric confidence bounds were calculated using the logit transformation.

2 Because individuals could choose more than one reason, figures sum to greater than 100%.

3 Rounded to the nearest 100 persons

4 Reasons an insurance company would refuse to cover an individual included 1) a pre-existing condition, 2) the individual exceeded lifetime benefits, or 3) some other reason.

Note: Estimates are not mutually exclusive, both by definition, and because a person may have reported more than one reason why uninsured.

5 These rates have not been age-adjusted. Age-adjusted rates are available upon request.

\*An individual was defined as unable to get care if they indicated that they delayed or were unable to obtain care because (1) their insurance would not cover the service, (2) the service was not available in their area, or (3) they could not afford to pay for the service.

1 Population estimates of sex, age groups, and local health district based on 2008 baseline projections, Governor's Office of Planning and Budget, queried February 5, 2009; all others based on the 2008 UHSS and rounded to the nearest 100 persons.

2 Asymmetric confidence bounds were calculated using the logit transformation.

3 Rounded to the nearest 100 persons.

4 Figures in these columns may not sum to the total because of data weighting and missing values on the grouping variables.

1 Population estimates of sex, age groups, and local health district based on 2008 baseline projections, Governor's Office of Planning and Budget, queried February 5, 2009; all others based on the 2008 UHSS and rounded to the nearest 100 persons.

2 Asymmetric confidence bounds were calculated using the logit transformation.

3 Rounded to the nearest 100 persons.

4 Figures in these columns may not sum to the total because of data weighting and missing values on the grouping variables.

5 These rates have not been age-adjusted. Age-adjusted rates are available upon request.

Note: Obesity was defined as a BMI of  $\geq 30$  or more. BMI is calculated by dividing weight in kilograms by the square of height in meters. For example, a male or female who is 5'8" is considered obese if he or she weighs 197.5 or more pounds.
