

Utah Small Area Information

In order to facilitate reporting data at the community level Utah has been divided into Small Areas. Areas are determined based on specific criteria, including population size, political boundaries of cities and towns, and economic similarity. The health measures that are reported by Small Area are those with events occurring with sufficient frequency to be meaningful. The IBIS query system allows you to query by Small Area for several modules.

To use the Utah Small Area query system select "Advanced Selection" on the "Module Configuration Selection" page.
